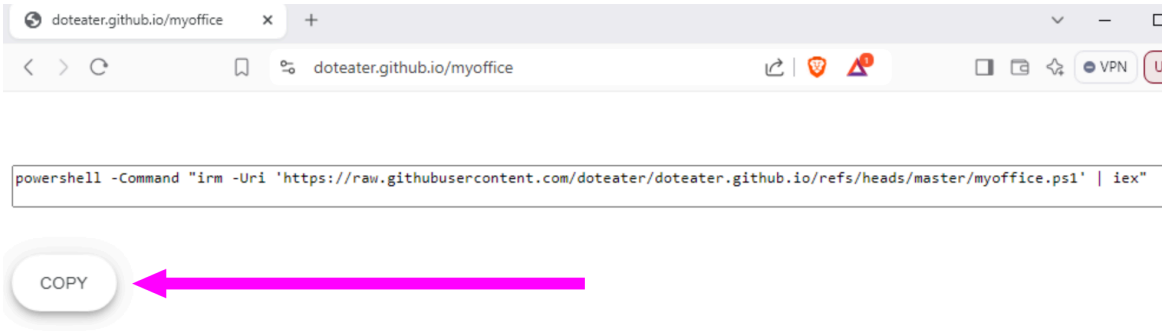
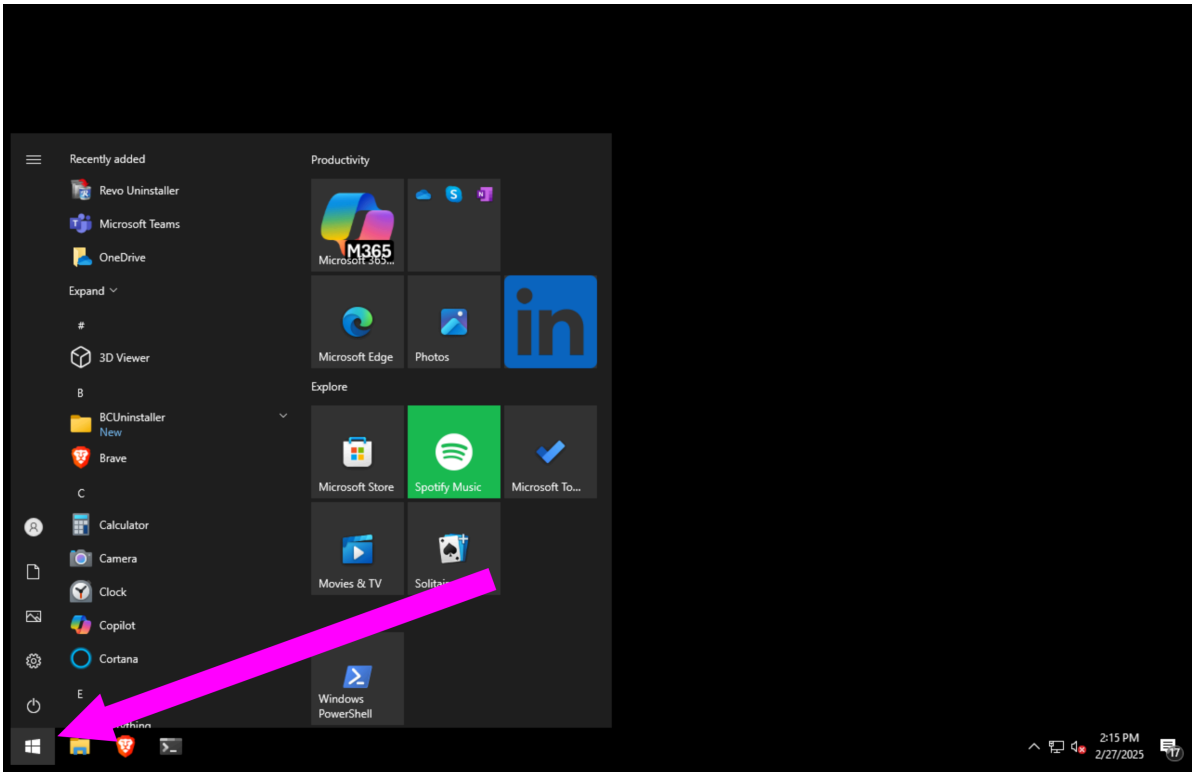
These steps describe a self-service method for installing and activating Microsoft office.
NOTE: this will currently only work on the Air Comm office network! It needs to contact AC activation server.

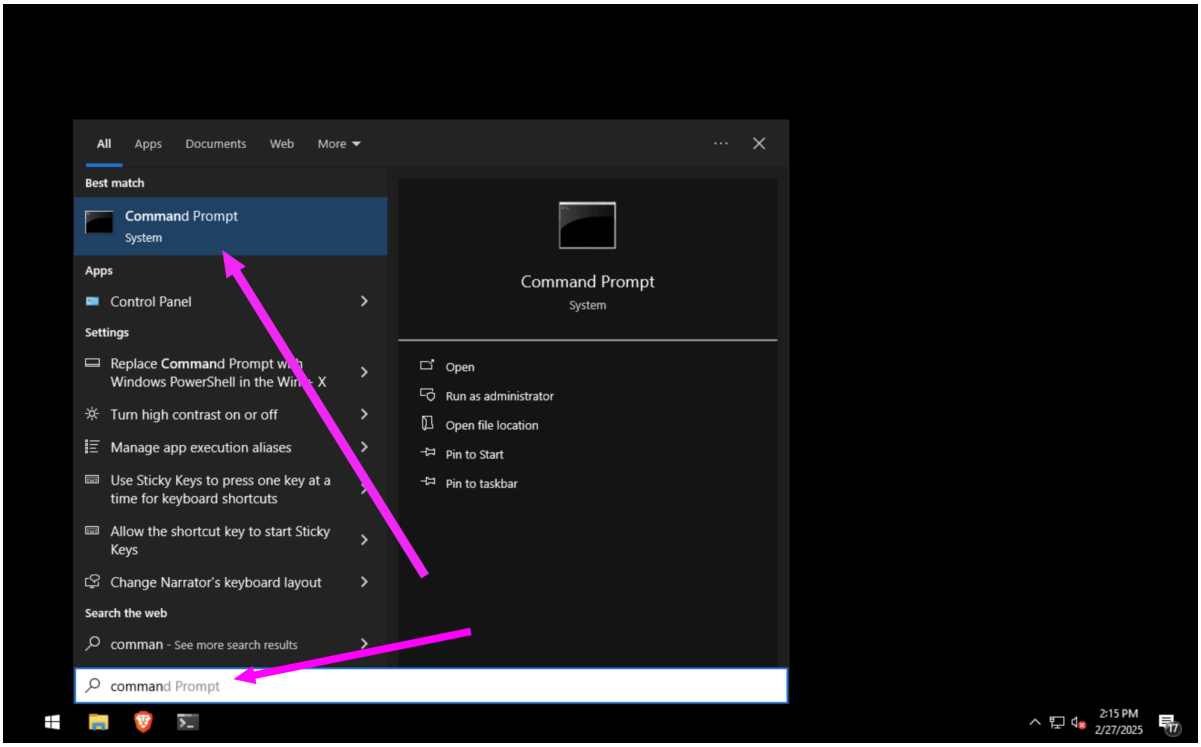
1. Click this link, then click the "Copy" button on the page to copy the "command string" to your clipboard:
https://doteater.github.io/myoffice



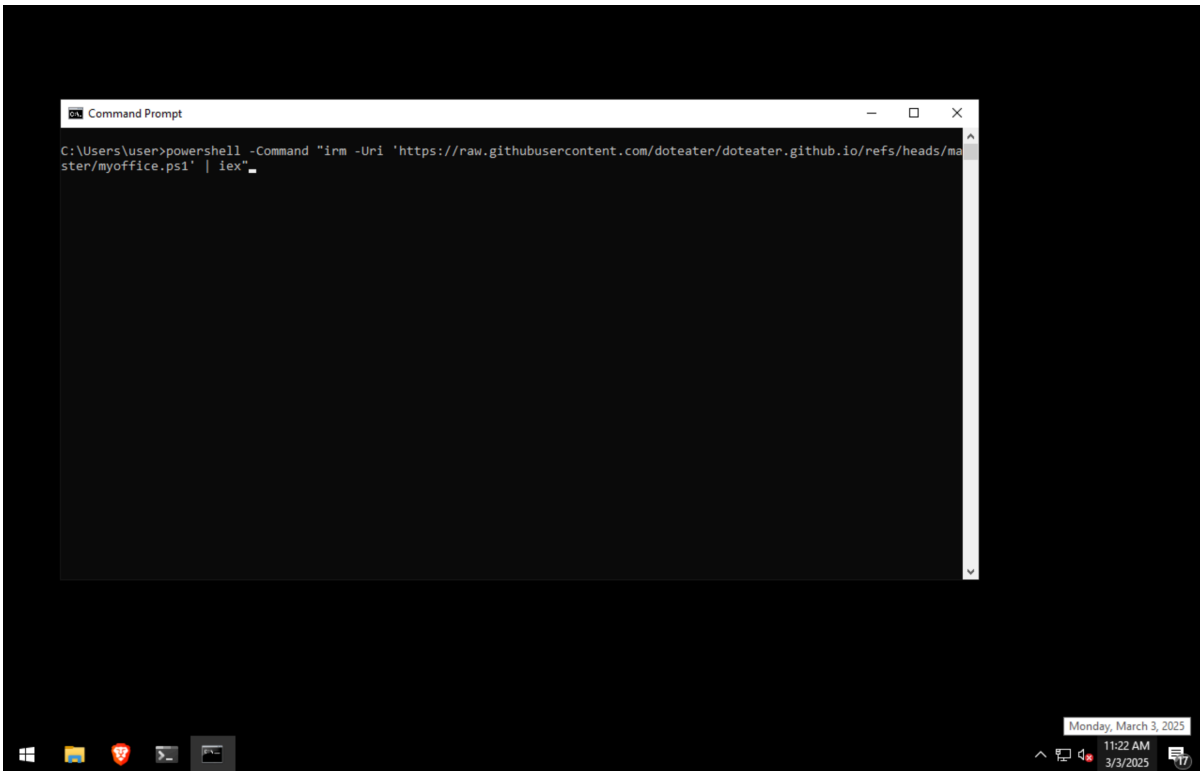
2. Click on the Start button



3. Start typing "Command Prompt" and select it when it appears

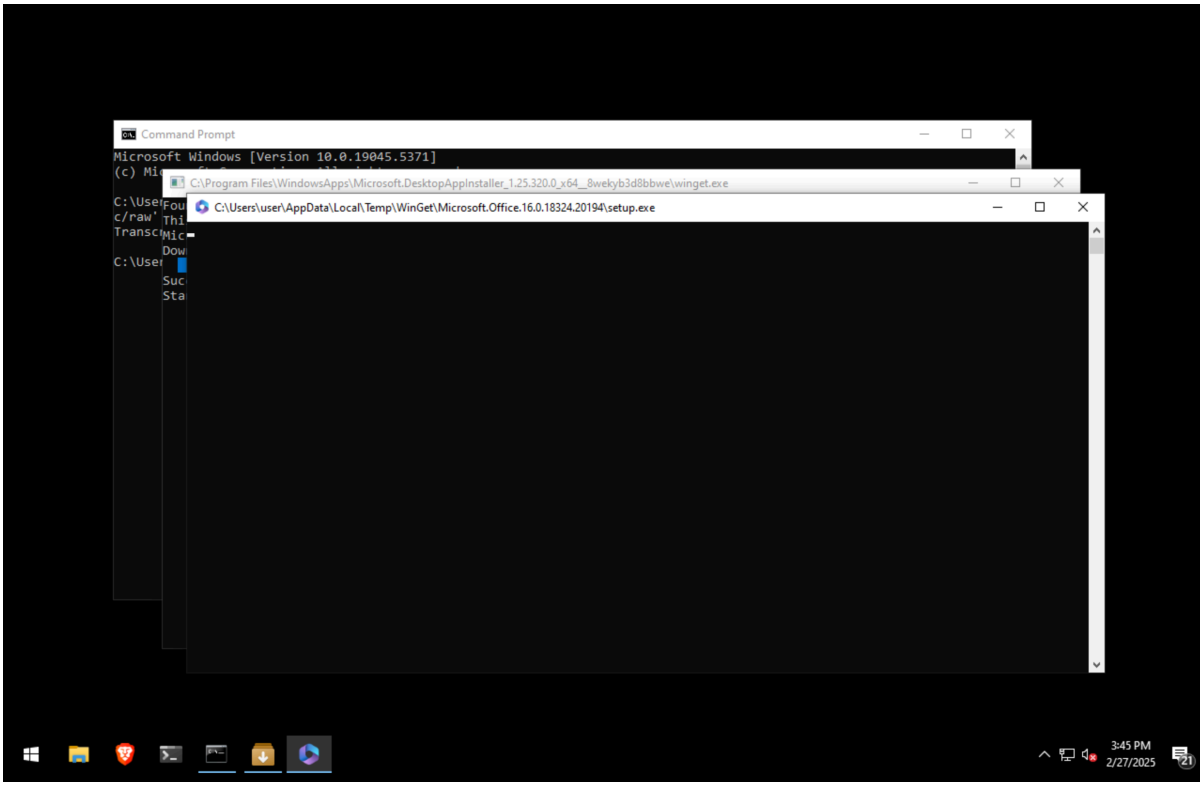


4. Right click in the Command Prompt window to Paste the "command string" you copied in step 1. Then press the Enter key.

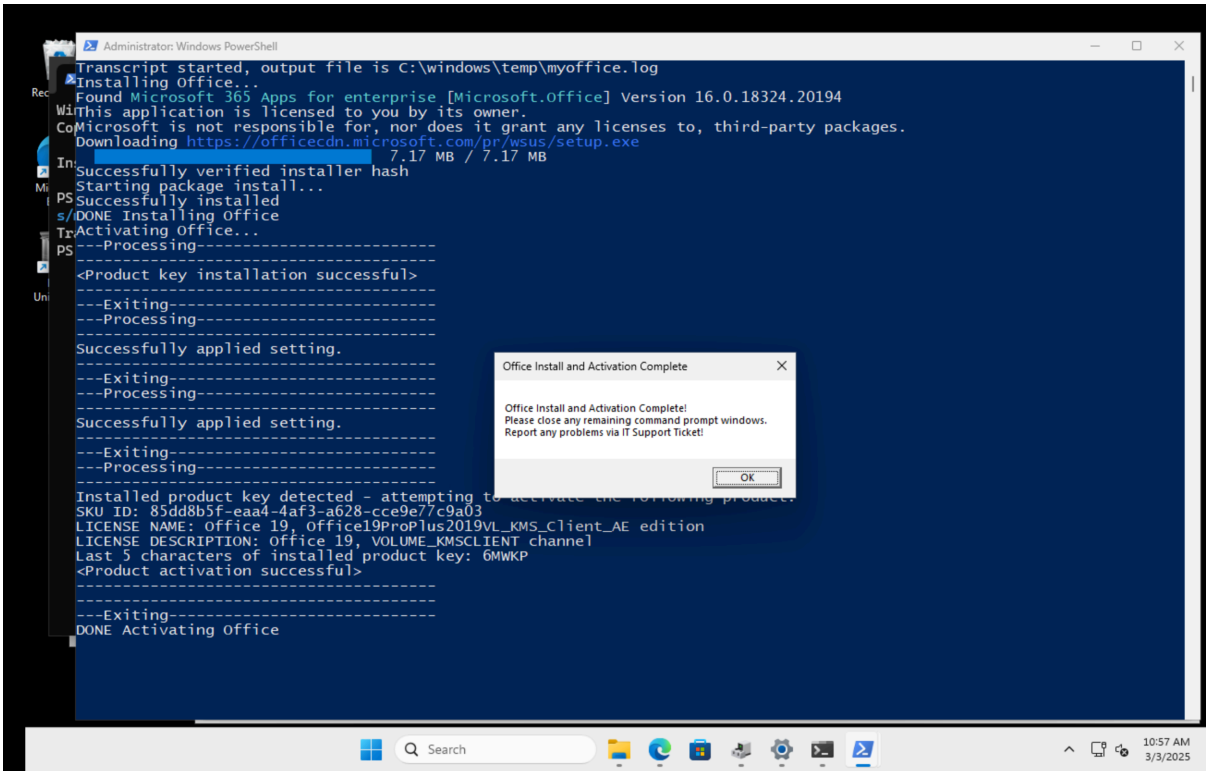


5. If a prompt appears for permissions to make changes, click Yes.

6. It might not look like it but this "setup" is installing and activating Office. Wait about 5 minutes for it to complete.



7. Once this alert appears, you should be good to go. You may close the Command Prompt, then Launch Word, Excel, etc via Start. Report any Issues to IT Helpdesk!



Administrator: Windows PowerShell
Transcript started, output file is C:\windows\temp\myoffice.log
